

2012-07: ready for take-off thanks to U500 with rubber abrasion remover at Prague Airport

Ready for take-off: thanks to the U 500 with rubber abrasion remover, it's all systems go at Prague Airport

Operating an airport is precision work on a grand scale. In order to guarantee safety during the hazardous take-off and landing phases of flight, the asphalt or concrete surface must be in perfect condition at all times. At Prague Airport, a new Unimog U 500 with the TrackJet® rubber abrasion remover from Weigel ensures proper traction on the runways.
